Report on 04-day seminar on General guidelines and steps in the research process

Month: 15-18 April 2020

Topics covered during the sessions of the Seminar:

27. General Guidelines and steps in the research process
28. Selection the research problem.
29. Literature review: different methods (including computer database) with their advantages and limitations.
30. Defining research problem and formulation of hypothesis.
31. Defining general and specific objectives.
32. Research design: observational and interventional, descriptive and analytical, preclinical and clinical, qualitative and quantitative.
33. **Collection, classification, presentation, analysis and interpretation of data** (Definition, utility and methods)
34. Sample design.
35. Collection of the data.
36. Analysis of the Data.
37. Generalization and interpretation, evaluation and assessment of hypothesis.
38. **Scales of Measurements** - nominal, ordinal, interval and ratio scales.
Types of variables – Continuous, discrete, dependent and independent variables.
39. **Type of series** – Simple, Continuous and Discrete

**Report on 3-day seminar on Preparation of research proposals in different disciplines
 for submission to funding agencies taking EMR-AYUSH scheme as a model**

Month: 10-12 June 2020

Topics covered during the sessions of the Seminar:

1. Preparation of research proposals in different disciplines for submission to funding agencies taking EMR-AYUSH scheme as a model.
2. Scientific writing and publication skills.
3. Familiarization with publication guidelines- Journal specific and CONSORT guidelines.
4. Different types of referencing and bibliography.
5. Thesis/Dissertation: contents and structure
6. Research articles structuring: Introduction, Methods, Results and Discussion, (IMRAD)
7. **Normal distribution:** Concept and Properties, Sampling distribution, Standard Error, Confidence Interval and its application in interpretation of results and normal probability curve
8. **Fundamentals of testing of hypotheses:**
 Null and alternate hypotheses, type I and type 2 errors.
 Tests of significance: Parametric and Non-Parametric tests, level of significance and power of the test, 'P' value and its interpretation, statistical significance and clinical significance
