COVID TESTING CENTRE

The COVID-19 pandemic created a global health crisis posing an unprecedented public health emergency. Laboratory testing is playing a critical role in efforts to control the COVID-19 pandemic, whether it's by diagnosing patients with the novel coronavirus or screening the general public to determine the full extent of the outbreak. Diagnostic tests detect either the genetic material (RNA) of the virus or viral proteins (antigen) in a sample from the respiratory tract. Effective management to address this infection is still evolving and attempts are being made to integrate traditional interventions along with standard of care.

The All India Institute of Ayurveda (AIIA) has also been designated as COVID-19 testing centre (RT-PCR and Rapid antigen testing) by the Delhi government. At AIIA hospital, COVID-19 free testing centre was started by the Department of Rog Nidan and Vikriti Vigyan (RNVV) from 26th June 2020 under the supervision of Prof. Anand More (HOD), Dr. Shalini Rai (Assist. Prof.), Dr. Richa Tripathi (Consultant) and Dr. Sarita Kumari (Consultant) which was formally inaugurated by the Prof. Tanuja Nesari, Director AIIA in the presence of all faculties on 10th July 2020., New Delhi.

Rapid Antigen Test (RAT) has been done by collecting [nasopharyngeal \(NP\)](#) swab, and/or a throat swab followed by RTPCR of symptomatic RAT negative patients. Till 31st March 2021, total 54023 tests have been done including 37414 RAT tests along with 16609 RTPCR tests. Among them, 1106 out of 37414 RAT (2.9%) and 491 out of 16609 RTPCR (2.9%) was found to be positive and 36308 out of 37414 RAT (97 %) and 16118 out of 16609 RTPCR (97%) was found to be negative. A COVID Call Centre has been established at AIIA for handling queries related to COVID 19 being raised by the general public telephonically. Ayurveda has a huge potential in preventive and curative health care in the pandemic. The current understanding of COVID-19 indicates that good immune status is vital for prevention and to safeguard from disease progression. Therefore, in many RAT positive COVID-19 patients, Ayurveda medicines were prescribed and distributed free of cost for their betterment.
